

MPower Musings March 2011

February 2011 - Our new Headquarters, bought last year as part of our continuing investment and commitment to the market, is taking shape, we have recruited additional staff to maintain service levels on the admin & maintenance side of the company and added to internal sales. We now have more storage space for spares & hire UPS, workshop area and SOHO UPS for shipment from stock and as a UPS company we have our own UPS & Backup generator. and are in the process of creating a full demonstration & witness test area for UPS.

We are pleased to announce that we are the UK partner for Inform UPS of Turkey (owned by Legrand). We offer the full sales & service package for this product in the UK.

The facility impressed us in the scope of their manufacturing capability and quality of product. They manufacture everything in house from transformers to PCB to cabinets so they control the quality and the cost. They also incorporate many interesting features (see photo) There are new ranges of UPS to be released later this year. The DSPM series has just seen 3/1 capability to 20kVA added. Pyramid DSP now has a isolation transformer range and a 3/1 range from 10kVA to 40kVA as standard.

The initial Inform UPS sizes available range from 1kVA - 10kVA Single Phase UPS through Three-phase input/Single Phase output 10 - 40kVA UPS to Single & Multiple Three Phase input/output 10,20, 30, 40, 60, 100 & 250kVA UPS installations. Complimenting these UPS we have a range of external bypass switches in 3, 5 & 7 switch configuration for single 1+1 and n+1 systems.

We are appointing resellers for this UPS range and will offer full support packages – for more information see our website.

We are supplying and installing an increasing number of new UPS and increasing our market share into increasingly diverse markets Aerospace, Call Centres, Media, Law Enforcement, Government, Legal, Building Societies, Banking, Financial Advisors, Recruitment, Power Stations, Consultants & Cosmetics Companies. Service contracts are increasing as MPower become known for Capability Commitment and Competitiveness.

We are continuing to expand our involvement in the Nuclear Industry with additional contracts.

We achieved in this last year UVDB & UVDV Verify approvals to compliment with our SafeContractor approval.

MPower UPS offers service support for the following equipment: Inform -Liebert - Emerson - RielloAros - AEC - Converex - EPI - APC - Silcon - Wood Group - Best - Powerware - Chloride - MGE - and many others + Generators, Emergency Lighting & Drives.
